

After Searching for EARPODS inside search-bar and then clicking search button we get to this page , all product listed here.

We choose one of them after validating , then it will show details of that product , also we will click add to cart button here.

After pressing add to cart , this page will shown up confirming product has been added to cart. This is last page of the application.

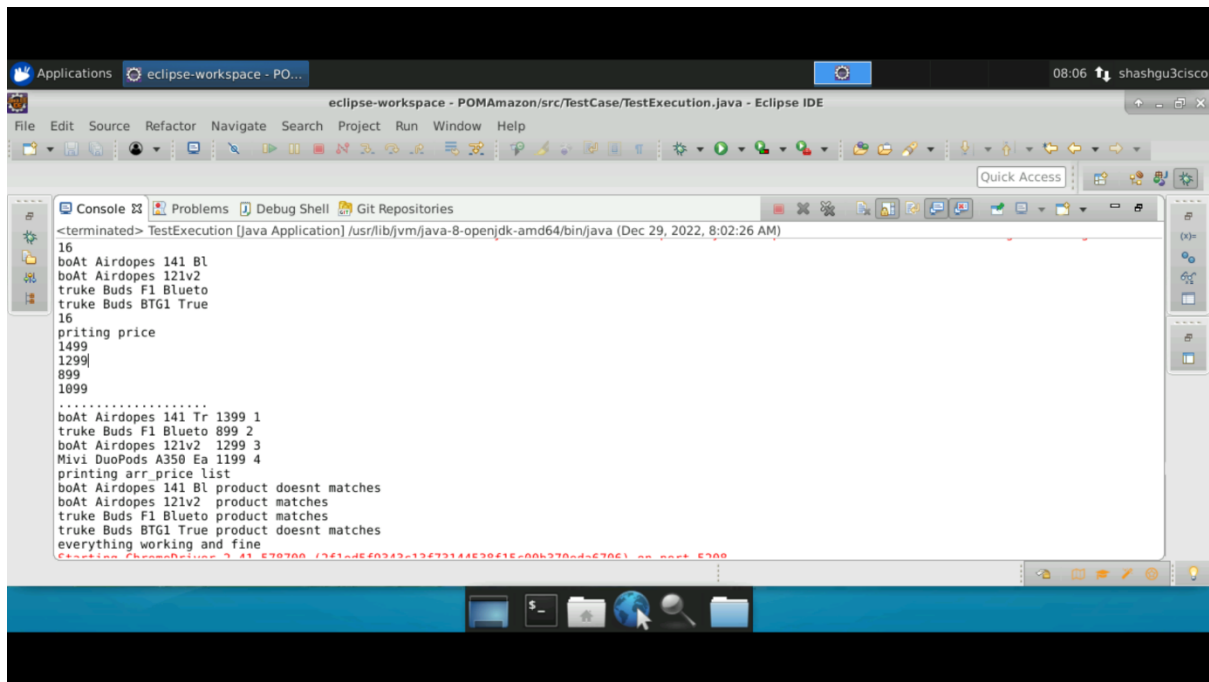

The screenshot shows the Eclipse IDE interface with the 'Console' window active. The console displays the output of a Java application running Selenium WebDriver. The output includes the following text:

```
<terminated> TestExecution [Java Application] /usr/lib/jvm/java-8-openjdk-amd64/bin/java (Dec 29, 2022, 8:02:26 AM)
Starting ChromeDriver 2.41.578700 (2f1ed5f9343c13f73144538f15c00b370eda6706) on port 25269
Only local connections are allowed.

```

This is console window of Eclipse where output of the program is shown above.

We can see printing first 4 product name and then their prices respectively.

```

```

In this console window, we are printing product name from amazon website and table from database.

After that we are printing if that product is matching or not and at the end printing everything working fine to check whether our application is running till end or not .

**So basically validation is going here
and after this step we click on any
product then we add to cart.**
